Installation Backboxes from B-System

About Our Solutions:

- Our backboxes support the audio quality of custom install speakers and unwanted sound propagation in the building (air-borne noise) is significantly reduced.
- Our system architecture allows for a wide range of options, even for demanding applications such as exposed concrete ceilings or brick walls.
- Our backboxes protect loudspeakers and technology from dirt, moisture, dust and insects.
- High-quality and robust components used
- Versatile standard program suitable for all common loudspeaker brands and models
- Standardized and well-known products and installation workflows
- Numerous documents such as data sheets and installation instructions available for each product
- Personal consultation from the B-System team
- Products in use thousands of times for years - worldwide!
