The CHV-RTS is a wall-mounted remote temperature sensor designed for use with select Crestron® thermostats. Using CAT5 or similar low-capacitance wire, the remote sensor may be mounted up to 500 feet (152 meters) from the thermostat. One-piece mounting and a single non-polarized twisted-pair connection make the CHV-RTS simple to install. The 1-1/2 inch diameter face protrudes just 1/8 inch from the wall surface and is easily painted or wallpapered to blend into the wall surface. Up to four CHV-RTS sensors may be connected to a single [CHV-THSTAT](#), [CHV-TSTAT](#), [CHV-TSTATEX](#), or [CHV-TSTATEX-FCU](#) thermostat.
